

# JAKE Armour plate

**JAKE** Armour plates have been designed to protect a base of a tractor cabin. Fuel tanks and battery boxes (if there are some) are also protected by **JAKE** Armour plates. For small service works, like changing oil filters, there are some shutters in the Armour plate therefore you don't need to take off the whole Armour plate. **JAKE** Armour plate is always mounted to **JAKE** Aid frame, which is included in **JAKE** Mounting kit. If you don't use **JAKE** Mounting kit, it is enough to buy **JAKE** Armour plate + Aid frame.

We offer numerous models of **JAKE** Armour plates for Valtra depending on tractor model and on its equipments. Different **JAKE** Armour plate models are listed in the directional table.

We also design and manufacture **JAKE** Armour plates for other tractor brands and models, so in case you don't find your tractor in the table, please contact us. We still may have solution for you.
