

MOTO CINCH™

SECURE THE ADVENTURE.

THE SAFE AND SECURE WAY TO TRANSPORT MOTORCYCLES.

SECURE THE ADVENTURE.

MOTO CINCH IS "BRILLIANT" – IT'S ABOUT TIME THAT A NEW PATENTED PRODUCT REPLACES THE HASSLE OF MOTORCYCLE TIE-DOWNS.

With the invention of the patented Moto Cinch, you can now avoid the headaches associated with traditional tie-downs and the amount of time it takes to carefully secure your motorcycle. Moto Cinch installation in any type of trailer, truck or RV allows you to better organize your motorcycles and keep them in unlocked positions for long-term storage. You simply pull up on the cam action lever when you are ready to start your trip. Moto Cinch eliminates the stress on forks, seals and springs that could affect performance. You can walk around your bikes without tripping or wasting time trying to get the proper pressure or angles. Moto Cinch, an industry-trusted and secure system, maximizes your valuable cargo space by offering the most versatile load configuration in the industry. Moto Cinch makes loading and unloading your bikes simple. Just **Click, Cinch and Go.**

MOTO TRACK

Selecting the best position to connect your Moto Cinch to the Moto Cinch Track system or single female connection maximizes the space in your truck, trailer, toy hauler or RV bed. The Moto Cinch Track or single connectors makes it easy to adjust positions for weight, balance, maximize flexibility and allows for more motorcycles to be safely stored or transported for your next trip. The Moto Cinch systems are ruggedized for easy installation and require no special tools to assemble.

From Motocross bikes to Super Motard bikes, the Moto Cinch easily secures multiple motorcycles. It is Simple, Easy, Fast and NEW. Moto Cinch is manufactured with Aircraft Grade Aluminum with a brushed finish. It is light-weight and yet very strong. The aluminum cinches have been tested by CRT Laboratories, Inc. The "MODPLAS" High-Tech Polymer series offers a generic black model and manufacturer-specific colors to match your bikes. Moto Cinch's fit most make and models of off-road motorcycles. The bolt-through anchors and body of the Moto Cinch keep your motorcycles secure in the toughest and most extreme terrains while reducing the load normally placed on front suspension springs and seals. While traveling, the Moto Cinch functions as an additional shock absorber which will keep motorcycles in place. Just **Click, Cinch and Go** and you are on your way.

TRANSPORT MOTORCYCLES.

Moto Cinch can also be used for transporting Sport Bikes. (MC has foot pegs or minor modifications can be made to stock pegs.) Moto Cinch will maintain the position and security of your motorcycle without the hassle of searching for attachment points for tie-downs or soft ties. The tie-downs on Sport Bikes often cause damage to the fairings and other attachment points. The Moto Cinch is versatile so that it can easily be adjusted for multiple-size motorcycles and aftermarket foot peg sizes. The Moto Cinch will be the new Standard for the way people secure their Sport Bikes, whether you're off to the track or heading off to another Adventure.

CLICK. CINCH. GO. TECHNOLOGY

MOTO CINCH HAS INVENTED, DESIGNED AND ENGINEERED TWO HIGH-TECH CONFIGURATIONS OF THE MOTO CINCH MOTORCYCLE SECURING SYSTEMS IN THE 2008 PRODUCT LINE.
