

BUILT FOR WORLD'S BEST HORSES

Product sheet: MaXuSS Zephyr (Horse dryer)

The solarium is an indispensable part in the good care of each horse. With the Q-line solarium you can treat your horse with heat before and after an exercise.

The Q-line solarium utilize infrared heat.

The infrared radiation penetrates the skin and has therapeutic properties.

The infrared rays will increase the blood flow in the muscles and hereby have a positive effect on the waste matter household which decreases the horses chance to get injured. The generated heat increases the rate in which the muscles can absorb blood sugars and expel lactic acids.

A warming-up under a Q-line solarium before a training or competition relaxes the muscles and reduces the chance your horse will get injured. The solarium is also ideal for drying your horse after washing.

The heat increases the muscle elasticity and has a softening effect when your horse is recovering from an injury.

The Q-line solarium are also available with the latest technological advances in light therapy. By exposing the horse to certain light frequencies a therapeutic effect is created and your horse is brought back into balance.

Unique benefits

Safety:

The Q-line solarium have been finished with round sides and corners which excludes the chance your horse will get injured.

The lamps are placed higher than the holders so that the horse can never come in to direct contact with the lamps.

Durability:

The Q-line solarium use up to 40% less energy than competitive products and are remarkably environmentally friendly. The heat resistant plastic is insensitive to corrosion and ensure minimal heat loss and a high efficiency.

The infrared lights in the Q-line® solarium are designed to be especially heat resistant and can endure great temperatures for extensive periods of time. These lamps can burn for a minimum of 5000 hours.

External characteristics:

The Q-line® solarium have a stylish appearance and smooth finishing. All solarium can be used directly and require no further assembly.

Maintenance:

The Q-line® solarium require little to no maintenance. With our technologically advanced design and the choice of materials we have ensured that corrosion is kept to a minimum.

Quality mark:

All Q-Line® solarium conform to the machine code 2006/42/EG and are fit with the CE norm. The Q-line® solarium are KEMA certified according to the NEN 3140 and Labor and health directive en hereby conform to all European safety demands.

Technical specifications

Power

Fohn a 2Kw	9
IR 250W	6
Total power in watts	19,5

Air fans

Number	12
m3/h	1080

Control

Air fans adjustable	•
Föhn per unit	•
IR lamps on/off	•
Lift control	•

Power connection

Power	3F + N + PE 400V 50Hz
Circuit breaker	3*32A
Total power consumption	20050

Material and dimensions

Modules	Heat resistant plastic
Colour top	Dark green RAL 6009
Colour bottom	Crème white RAL 9001
Lamp armature	Aluminium
Wiring	Heat resistant 180 °C
Suspension	Steel
Dimensions L x W x H in meters	2,4*1,3*0,8
Weight	70 Kg

Guide lines

Approval	CE
IP value	IP54

Including

Shape manually adjustable	○
Shape automatically adjustable	○
Fixing kit	•
Build-in LED lighting	○
Electric lift installation	○

Optional ○, Standard •, Impossible X
